

# SHARIFUZZAMAN HASAN

Software Engineer

Dhaka, Bangladesh | +8801302-216999 | shasan2200@gmail.com

github.com/SharifuzzamanShaon | linkedin.com/in/sharifuzzaman-hasan-0b561521a

## PROFESSIONAL SUMMARY

---

Backend-focused Software Engineer with solid experience of engineering scalable software architectures using Node.js and Express. Skilled in designing domain-driven systems and building robust APIs with PostgreSQL, MongoDB, and Redis. Experienced in implementing authentication, automation workflows, and admin systems for production applications, with a strong focus on clean architecture, performance, and system reliability.

## PROFESSIONAL EXPERIENCE

---

### Software Engineer

Codixel Tech

Mohammadpur, Dhaka

July 2025 – Present

- Engineered full-stack solutions using Node.js, Express, PostgreSQL, and MongoDB, alongside building dynamic user interfaces with Next.js and GSAP animations, including a high-performance 3D customization platform.
- Implemented a cron-based file cleanup system to remove unused data assets, reducing server storage usage by 25% and improving memory efficiency.
- Built a real-time live-chat system with Socket.IO (WebSockets) supporting authenticated agents and anonymous guests, room-based message routing, online-presence tracking, and auto-emailed conversation transcripts.
- Optimized database performance through query tuning and indexing, improving API response times by 30%.
- Developed an online MCQ exam platform with advanced OMR-based answer processing, automated question bank management, and result generation, reducing manual workload by 60%.
- Engineered automated admin panel with role-based access control (RBAC) to manage multiple business roles and sub-admin dashboards, featuring real-time status tracking and system monitoring.
- Applied Domain-Driven Design principles for modularity, scalability, and long-term maintainability.

## PROJECTS

---

### 100PercentCustom — Team Apparel E-Commerce Platform [www.100percentcustom.com](http://www.100percentcustom.com)

Full-Stack Backend Engineer | Node.js, Express.js, MySQL, Prisma, Stripe, Firebase, JWT

- Architected a scalable multi-tenant B2B backend supporting multiple user roles and end-to-end custom team apparel store operations.
- Engineered the backend for a 3D product configurator, enabling customizable models, dynamic pricing, and persistent design state from customization through checkout and production.
- Built a real-time chat system using Socket.IO with JWT authentication, guest sessions, online presence, and automated email chat transcripts.
- Developed Stripe Payment Intent and webhook-based payment with real-time order synchronization.
- Engineered a complete order and factory production workflow with priority queue management and artwork approval system, improving dashboard performance by ~40%.
- Automated background operations with node-cron jobs - auto-closing expired stores and enforcing a 90-day chat-retention cleanup policy.

## MCQEntra — Exam Preparation SaaS Platform (Backend) [www.mcqentra.com](http://www.mcqentra.com)

Production-grade RESTful API backend powering a competitive exam SaaS platform with dynamic exam generation, subscriptions, live rankings, performance analytics, and payment integration. API consumed by a Flutter mobile application.

- Developed a custom exam generation engine with largest-remainder allocation and 3-level fallback for balanced question distribution.
- Optimized result retrieval by pre-computing exam scores and analytics, reducing fetches to a single indexed lookup.
- Engineered a live ranking & percentile system with standard competition ranking, multi-level tiebreakers, and localized leaderboard windows.
- Built a smart performance analytics engine that identifies weak topics, tracks subject-wise accuracy, and detects guessing patterns from exam results.

## TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, C & C++, Go (Familiar)

**Frameworks & Libraries:** Node.js, Express.js, React JS, Next.js, Mongoose, Prisma

**Database:** MongoDB, MySQL, PostgreSQL, Redis

**Architecture and Design:** RESTful APIs, GraphQL, WebSocket, Socket.IO, Domain-Driven Design

**Tools and Platforms:** Git & GitHub, Docker, AWS (Basic), VPS, Vercel

## EDUCATION

---

**Bachelor of Science in Computer Science & Engineering**

*Southeast University, Dhaka*

## ACHIEVEMENTS

---

- TVE Skill Innovation Fest, 2024 - 1st Runner-up in Quiz Contest, Inter University.
- Digital Innovation Fair Award 2018 in Best presentation *Rajshahi* Division, Organized by a2i, *ICT Ministry*.
